

BASF PETRONAS Chemicals

ENERGY POLICY

At **BASF PETRONAS Chemicals** we are committed to making our contribution to sustainability. We believe that "Chemistry Drives Sustainability."

We strive for a reduction of greenhouse gas emissions and other related environmental impacts and an enhancement of our energy efficiency.

As part of our sustainability strategy we apply the following guidelines:

- Compliance with applicable legal and other requirements related to energy use, consumption and efficiency
- Ensuring resource conserving, economical and reliable energy supply and efficient use of energy
- Ensuring the availability of necessary information and resources to achieve energy objectives and targets
- Focusing on the selection and application of environmentally friendly technologies in engineering, construction and operations of our plants as well as during the procurement of products and services
- Continually improve the energy performance and effectiveness of the Energy Management System (EnMS)
